PROJECTS

Attendance Checker And Online Meeting Application

[31 Dec 2020 – 4 Jun 2021]

An android-based smart attendance management system to be used in the department of computer science at KNUST.

The application includes separate dashboard for students and lecturers.

Lecturers will access their dashboard to

1. Set the date, time, and lecture hall for each lecture, which will then be encoded into QR codes with autogenerated unique codes.
2. View their students' attendance records for each academic semester.
3. Start an online class section with the aid of the Zoom SDK.
4. View the semester time table for the department to identify lecture periods.
5. Print the records of the date and time of students who attended a particular lecture.

Students will access their dashboard to

1. View attendance records of the lectures they have attended during an academic semester.

2. Scan QR-CODE provided by specific tutors within a specified date, time frame, and specific distance from the coordinates of the lecture hall.
3. To use the Zoom SDK, to join an online class section created by a specific tutor
4. View the semester time table for department to identify lecture period.
